How to install your new WordPress theme:

Instructions on how to install your new WordPress theme can be found [here](#).

How to use the **Latest News** section:

1. Sign into your Wordpress Administration Panel, click Manage > Categories. Click the 'Add New' link to create a new category and name it: 'Latest News'
2. Once you have created your new category, take note of its ID. With a text editor*, open your index.php file and find the following on line '7' : `<?php if (in_category(23)) continue; ?>`
Replace the number **23** with the ID of your 'Latest News' category.

From now on, each time you create a post and have your 'Latest News' category checked, this post will be posted in the **Latest News** section of the theme.

*Need a text editor? I highly recommend [NotePad2](#).

Random Photos

To take advantage of the random photo script, upload any photo to your wp-content > themes > natureshighlight > images > rightimg

For best results, please keep your image resolution at: 500x200.

Finding any bugs?

Please report any bugs you may find in the [support forums](#).
